

Nick Boley – Candidate for CoR BoD

21 years in USAF as a pilot, flight instructor, classroom instructor, Chief of Operations at a flying training wing, Chief of Safety, Deputy Director at Air Education and Training Command, Deputy Department Chair at US Air Force School of Aerospace Medicine.

Skills learned – The criticality of teamwork; building, motivating, and leading teams; developing and achieving team goals; budgeting and managing resources.

15 years in the corporate world as a Project Manager starting with small projects to large software development projects and Program Manager over very large software projects. Managed a software development team and a multi-national software test team.

Skills learned- Leading efforts across multiple teams, leading large efforts and making things happen, focusing on accomplishment of goals, meeting expectations (up, down and customers).

Owned businesses and was General Manager of a small business

Skills learned – There is no budget to spend without revenue, balancing revenue generation and cost control, growing by setting goals and developing a plan of action to meet the goals.

Overall skills – Strategic planning, problem solving, determining what needs to be changed, developing a change management plan.

I have been interested in racing and more specifically road racing since I can remember. I have worked as a corner worker and starter in SCCA road racing. Since working with CoR I have only missed one race. I have also worked Track Night in America on the grid for the last two years. In addition, I worked races for other clubs and have worked pro racing events for four years. I recently completed SCCA driver school and plan to have my competition license by the end of season.

Why the Board of Directors? I want to bring my background both in SCCA and also in various types and sizes of organizations to work on moving CoR forward. I feel I can apply my background in change management, problem solving and strategic planning to CoR issues.
